Education

University of the Philippines Cebu — Cebu City, Philippines
Bachelor of Science in Computer Science — 2024 – Present

- **Honors:** Iskolar ng Bayan; DOST-SEI RA 7687 Merit Scholar (full scholarship with living allowance)
- **Relevant coursework:** Algorithms and Data Structures, Software Engineering, Systems Architecture, Discrete Mathematics, Data Science, Artificial Intelligence

Cebu City National Science High School — Cebu City, Philippines
Senior High School, STEM Strand, with High Honors; Junior High School, with High Honors — 2018 – 2024

Projects

Scholaris — Scholarship information system
Founder and Lead Developer — Feb 2026 – Present

- Building a scholarship platform that replaces spreadsheets and email chains with one system of record for institutions.
- Designed scholar lifecycle management, per-term compliance, appeals, support tickets and an owed-vs-paid stipend ledger.
- Architected with Clean Architecture, DDD and CQRS on Blazor Server, .NET 10 and PostgreSQL, with white-label theming.

UPCSG Website — upcsg.org
Full-Stack Developer — Jul 2026 – Present

- Built and deployed UP Cebu's Computer Science Guild platform: events, officer directory, Hall of Fame, opportunities.
- Built a merch store with product variants, cart-to-checkout, order tracking and officer-confirmed GCash receipts.
- Delivered a JWT-secured admin CMS with Google sign-in (Blazor WebAssembly, FastEndpoints, PostgreSQL, AWS S3).

Ponyfolio — ponyfolio.com
Founder and Developer — Aug 2026 – Present

- Launched a publishing and commissions platform for Pony Town designers; 36 designs from 27 creators as of October 2026.
- Built a commissions marketplace: packages, slot allocation, staged job tracking, paid creator tiers, admin analytics.
- Wrote a companion browser extension that reads the game's editor and renders every setting and hex colour into one image.

FindersJeepers — Fleet management platform
Full-Stack Developer — Apr 2026 – Jul 2026

- Built jeepney fleet dispatch for drivers, routes and trips with real-time maps and a public journey map (Blazor, PostgreSQL).

Additional projects

- **Amiki** (Sep 2026 – Present): personal organiser for tasks, ideas and school announcements; Blazor WebAssembly, PostgreSQL.
- **Project Artemis** (Jun 2026): server portal and player dashboard for a Minecraft community of UP Cebu students; Blazor.
- **ExamGrinder** (May 2026): exam-prep quiz app with topic filters and shuffled question banks; React.
- **SMS Bulker** (Apr – May 2025): bulk SMS rig over a bank of phones for UP Cebu NSTP community outreach; Python.

Skills & Interests

- **Languages:** C#, SQL, C, C++, HTML/CSS, Python, JavaScript
- **Frameworks:** ASP.NET Core, Blazor (Server, WebAssembly), FastEndpoints, EF Core, MediatR, SignalR, MudBlazor, React
- **Architecture and data:** Clean Architecture, DDD, CQRS, REST APIs, PostgreSQL, SQL Server, JWT, Google OAuth
- **Cloud and tools:** AWS S3, Docker, Git, GitHub Actions, xUnit, DNS and custom domains (Cloudflare)
- **Interests:** Video production (YouTube channel, about 2,000 subscribers), writing, public speaking, speed typing
